Canadian Federal Election 2019 Seats Share Market

MARKET PROSPECTUS

CA19SM

Seo 1–Oct 20, 2019

Overview

This prospectus describes the futures contracts traded in the Canadian Federal Election 2019 Seats Share Market, identified by the trading symbol CA19SM, in the *Sauder School of Business Prediction Markets* (SPM). The purpose of this market is to predict the share of parliamentary seats in the forthcoming election for the Parliament of Canada on Monday, October 21, 2019. Except as specified in this prospectus, trading rules for this market are the same as specified in the online user's guide on the predictionmarkets.ca web site.

Opening and Closing

Trading activity in the CA19SM market commences on Sunday, September 1, 2019, and continues until and including Sunday, October 20, 2019, the last day before voting takes place. During each trading day, the market opens at 06:30 Pacific Time with an initial auction of limit orders that have accumulated since the last closing of the market. The market closes at 20:30 Pacific Time on all trading days. During the nighttime non-trading hours, traders may still submit limit orders through the trader interface.

Liquidation Values

Liquidation values of the contracts traded in this market are determined by the official final (not the election-night preliminary) results as determined by *Elections Canada* and as published on their web site. Due to the possibility of official recounts in close races, the announcement of final results may be delayed by a few weeks after the election. Liquidation of contracts will take place within a week of announcement of the final results. Payoffs are determined by the fraction of seats won by the political parties represented by the contracts. There are 338 seats in total. For example, a party that wins 101 seats would receive a share $101/338=0.2988$ of the seats, which implies a payoff of \$0.2988 for the corresponding contract. Details of the computation rules appear in our online user's guide. The judgment of the SPM Director in consultation with the SPM Advisory Board will be final in resolving questions of interpretation and typographical or clerical errors.

Contracts and Contract Bundles

Contracts are traded in 1/100 cent (basis points) increments. Bundles consisting of one share of each of the contracts in this market can be purchased from or sold to the SPM system at any time. The price of each bundle is \$1.00. The following contracts constitute a contract bundle:

Symbol	Short Name	Payoff Description
CA19SM.LIB	Liberals	\$1 times the share of parliamentary seats won by the Liberal Party of Canada in the Canadian Federal Election 2019
CA19SM.CPC	Conservatives	\$1 times the share of parliamentary seats won by the Conservative Party of Canada in the Canadian Federal Election 2019
CA19SM.NDP	NDP	\$1 times the share of parliamentary seats won by the New Democratic Party in the Canadian Federal Election 2019
CA19SM.BLQ	Bloc Québécois	\$1 times the share of parliamentary seats won by the Bloc Québécois in the Canadian Federal Election 2019
CA19SM.GRN	Green Party	\$1 times the share of parliamentary seats won by the Green Party of Canada in the Canadian Federal Election 2019
CA19SM.OTR	All others	\$1 times the share of parliamentary seats won by all other parties and independents in the Canadian Federal Election 2019

Governing Rules

This market is governed by the rules and regulations posted on the SPM web site. Traders are required to familiarize themselves with the trading rules as posted on the SPM web site. Trading is open to all Canadian residents with a valid Canadian postal address. Minimum (\$25) and maximum (\$1,000) investment limits apply. Traders bear the risk of financial gains and financial losses. Funds in a trader's cash account are fungible across markets. There are no trading fees of any kind. Requests to withdraw funds must be submitted through the web interface. Cheques for divestments can only be mailed to Canadian addresses.
